

PRODUCT OVERVIEW

- Enhances development process productivity through automation
- Improves software requirements management and decision making
- Manages software change, configuration and release
- Meets compliance demands without the costly diversion of financial and human resources
- Enhances quality assurance management with automated regression test software
- Automates complex multi-platform workloads

Enterprise ALM

ADC has been providing enterprise-level application management solutions to the IBM i community for over 20 years. Because of our deep experience, ADC has been selected as a strategic technology partner for MKS products and services. ADC offers a range of standard ALM solution templates and best practices to provide out-of-the-box and custom capabilities to address software management requirements. With MKS Integrity, organizations can deploy ALM solutions that offer coherent competence across the disciplines, eliminating the risk associated with trying to integrate disparate solutions and radically increasing both visibility and traceability across the application lifecycles. For the CA Plex developer, ADC Austin provides specific tooling to help manage and automate the software development workflow. ADC offers CA Plex-focused solutions to support you during all processes of software development, from user change request to testing and implementation.

Automated Regression Testing

As part of ALM best practices, ADC recommends automated functional testing software for test life cycle management and cross-platform business process validation. ADC has selected Worksoft Certify as a complete solution designed for business analysts that is powerful enough to validate cross-platform business processes. Worksoft Certify eliminates custom coding and programming, a requirement of most legacy test automation products, making it fast and easy to implement and maintain.

CUSTOMER STORY
MANUFACTURING

How ADC's Strategic Technology Partner, MKS, Helped a Steel Company's IT Group Solve a Critical Business Issue

A southeastern US steel company's IT group, with no formal Help Desk and a maintenance contract about to expire, was facing a rather sizeable dilemma. Certain requirements were simply not being supported by their existing software change management solution, Softlanding TurnOver™, and the company was in need of a low-maintenance, customizable solution designed to address the issue.

ARCHITECTURAL EXPERTS
DEVELOPING ADVANCED IT
SOLUTIONS SINCE 1998

HISTORY OF THE ADVANCED DEVELOPMENT CENTER

Founded in 1998 as a division of Synon (now part of CA), ADC Austin is in the business of designing, building, and modernizing custom enterprise applications on midrange servers. The company's modernization expertise is centered on IBM i applications developed with RPG and COBOL; in particular, those applications developed with CA's 2E and Plex architected rapid application development (ARAD) tools. ADC Austin's successful Model-Based Modernization Methodology (M3) approach to modernization consists of proprietary automated modernization software, best-of-breed tools from industry leaders, and a world-class services organization with deep architect-level expertise in the CA, IBM, and Microsoft toolsets. ADC provides its modernization software and services worldwide through a network of partners on every major continent.

In addition to legacy modernization, ADC Austin provides software consulting services, classroom training, and staff augmentation to the IBM System i and CA ecosystem. ADC Austin is the primary North American partner and reseller for CA's model-based development tooling, including CA 2E, CA Plex, and CA Repository. ADC is also an MKS certified reseller and services partner, and provides an Application Lifecycle Management practice for the IBM i customer. Other active partnerships include midrange software industry leaders such as IBM, Microsoft, Worksoft, and Databorough. Let ADC Austin's software and services be your guide to moving forward on the IBM i platform.

Our solutions are helping businesses just like yours grow and succeed.

ADC Austin is a full service remote development and support facility focusing on:

■ IBM i MODERNIZATION

ADC Austin's successful Model-Based Modernization Methodology (M3) approach to modernization consists of proprietary platform modernization software, best-of-breed third-party tools from industry leaders, and a world-class services component with deep expertise in the CA, IBM, and Microsoft toolsets.

■ WEBCLIENTⁱ⁺ FRAMEWORK

The WebClientⁱ⁺ Framework for CA Plex, developed by ADC Austin, unlocks the promise of RIA application generation directly from a CA Plex model based development environment. WebClientⁱ⁺ enables complete internet application generation from the presentation layer (HTML, JavaScript, Ajax) to back end business logic (RPG, .NET or J2EE).

■ APPLICATION LIFE CYCLE MANAGEMENT

ADC Austin's Application Lifecycle Management practice helps enhance development process productivity using automated change management and quality assurance tools. The result is better decision making, improved audit compliance, and a more efficient software construction team.

■ MODEL DRIVEN DEVELOPMENT TOOLS

ADC's model based development tooling and services help organizations build like-for-like applications faster, cheaper, and with higher quality. We accomplish this by reducing multiplicity and churn rate of platforms and languages, allowing IT to focus on business functionality. A Gartner study showed that only these tools produce a first year net break even.

■ PROFESSIONAL SERVICES

ADC is a professional services partner that can help ensure success with an approach that provides the best possible balance of cost, speed and quality throughout the application development lifecycle. ADC offers a full suite of services, including mentoring, development specialists, and onsite or remote training.

■ CASE SPECIFIC IT MANUFACTURING SOLUTIONS

We're aware that each industry has its own specific challenges, but few are as demanding as a manufacturing production floor. Our 12 years of experience in developing and supporting IT manufacturing processes provides us with a unique and proven approach to solving problems.
